Dear colleague,

It is a pleasure to get in touch with you through this letter.

We are working on a mission mode to build India into a \$5 trillion economy as envisioned by Honourable Prime Minister Shri Narendra Modi. You all have to play a key role in this journey. Indian steel industry, the world's second largest steel producer, has immense potential to impact the global steel industry and at the same time influence the national growth in a distinctly positive way.

The steel industry is the backbone of the economy impacting almost every sector, including infrastructure, construction, automobile, petroleum, power, coal, manufacturing and so forth. Our domestic steel industry is on a solid trajectory with a promising growth forecast. I am confident that the targets envisioned in the National Steel Policy 2017 will take the Indian Steel Industry to newer pinnacles.

I believe every person employed in steel industry has made invaluable contribution to propel India to become the second largest steel producer globally. Your role will be equally vital to take Indian steel sector to newer heights playing a major role in the Indian growth story.

In order to strengthen "Team Steel India" and bring more shine and strength to Indian steel, let us renew our determination to put our best foot forward. Look forward to your ideas and suggestions.

Jai Hind!

  
(Dharmendra Pradhan)
